Postgraduate Diploma in Project Management

Programme Description

Take your project management expertise to the next level with the online Postgraduate Diploma in Project Management. This advanced qualification is designed for professionals who want to strengthen their ability to lead projects, manage risk, control costs, and deliver strategic outcomes in increasingly complex organisational environments. Combining management theory with practical project management application, the programme equips students with the skills required to successfully manage projects from initiation through to completion. Students explore advanced project planning and scheduling techniques, procurement and contract management, project finance, risk management, quality management, stakeholder communication, leadership, and strategic decision-making.

You will learn

- To apply advanced project management principles,methodologies, and best practices across a range of industries.
- How to develop comprehensive project plans that align with organisational and strategic objectives.
- To use project management software such as MS Project to plan, monitor, and control project performance.
- How to design and manage project schedules using industry-recognised scheduling techniques and tools.
- To develop, manage, and optimise project budgets, cash flow forecasts, and financial performance.
